

Appendix E

Currently accepted genera and subspecies described by A. O. Hume

This list was generated by reference to the 'References of Scientific Descriptions' at the end of each volume of the recently completed *Handbook of the birds of the world* (1992–2011; Barcelona: Lynx Edicions), plus searches on the Internet Bird Collection; and then kindly checked by T. P. Inskipp against Dickinson, E. C., ed. (2003) *The Howard and Moore complete checklist of the birds of the world*. Third edition. London: Christopher Helm.
